Do you know what happens to these Polystyrene containers once they have been used?

- Less than **1%** of polystyrene is recycled in the UK due to contamination and lack of infrastructure.
- Expanded polystyrene (EPS) can take **500+** years to degrade, breaking into microplastics that pollute soil and waterways.
- Over **22 million** polystyrene fish boxes are used in the UK every year – many end up in landfill or as litter in coastal areas.
- Wildlife in UK rivers and coastal zones often mistake polystyrene fragments for food, leading to ingestion and harm.

What's your alternative to polystyrene?

How about a strong, reliable, 100% kerbside recyclable insulated box

At Just Packaging, we're proud to introduce the Just Thermo Insulated Box. It's designed to match the thermal performance of polystyrene, keeping your products protected, chilled or frozen during transit — without the environmental guilt.

Made from at least **70%** recycled material and fully kerbside recyclable, it's a smart, sustainable choice your business and customers will appreciate. It's the smartest switch you'll make today.

Easy to Assemble & Condition

Designed for fast packing and reliable performance

Polystyrene Free

Performs like polystyrene, without the environmental cost

Custom Sizes Available

Bespoke manufacturing based on your volume needs.

Brandable Outer Box

Promote your business with custom printing

Tested & Trusted

Backed by 15 years of experience within the temperature sensitive shipping sector

Strong & Durable

Holds up to 25kg

100% Kerbside Recyclable

Made from at least 70% recycled content

Frozen
24Hrs*

Chilled
48Hrs +*

*with suitable coolents
